EDUCATION

Carleton University

Bachelor of Computer Science Honours

Ottawa, Ontario

Anticipated Graduation: December 2026

TECHNICAL SKILLS

Languages: Java, Ruby, Python, C++, C, SQL, TypeScript, HTML/CSS

Frameworks: Spring, Mockito, React.js, Node.js, JUnit, AWS CDK

Developer Tools: Git, Azure, Docker, Kubernetes, Jenkins, Postman, Jira

WORK EXPERIENCE

Shopify Inc.

May 2025 - Present

Software Engineer Intern - Growth RnD, Sell in Minutes

Toronto, Ontario

- Developing retail merchant onboarding features using **Ruby**, **React** and **GraphQL**, reducing setup time and accelerating first time sales for merchants.

Carleton University

September 2022 - December 2024

Teaching Assistant for Abstract Data Types and Algorithms

Ottawa, Ontario

- Guided **600+** students in mastering data structures, algorithms and complexity analysis via office hours.
- Led exam review sessions and algorithm optimization workshops, contributing to **200+ A+ grades**.

Royal Bank of Canada

May 2024 - August 2024

Software Developer Intern - Financial Data Exchange

Toronto, Ontario

- Developed data exchange RESTful APIs in **Java** incorporating **JWT**, impacting **15M+** online banking users.
- Automated testing of core distributed services components with **100% JUnit test coverage** using Mockito.
- Migrated 5 services from Jenkins to GitHub Actions, enabling stage-level reruns & reducing build times by **30%**.
- Engineered a **Spring WebFlux** orchestrator that triggers downstream services based on user interactions, reducing app load times by **50% (4s to 2s)**.

Royal Bank of Canada

May 2023 - December 2023

Software Developer Intern - DevOps Engineering

Toronto, Ontario

- Automated onboarding by developing a service intake portal in **React**, increasing registered services by **35% QoQ**.
- Reduced internal LMS homepage load times by **25%** via on-scroll lazy-loading of course components in **React**.
- Built a GitHub discovery integration using YAML configs, automating user entity onboarding across DevOps.
- Developed a **Python** ETL pipeline to transform messy data, eliminating repeated Entra ID calls and reducing front-end load times by **40% (4s to 2.4s)**.

PROJECTS

Save Soil Outreach Bot | *Python, Git*

([GitHub](#))

- Developed a Python-based email bot that automatically contacts global leaders on soil preservation, streamlining outreach and boosting public awareness.

Nerd Express Taxi Game | *C++, STL, Git*

([GitHub](#))

- Developed an interactive taxi game with 2D map visualization and Manhattan distance for optimal pathfinding.
- Facilitated taxi assignment using a greedy algorithm, applying optimization mathematics to minimize wait times.

RaDoTech Health Monitoring Simulation | *C++, Qt, SQLite, Git*

([GitHub](#)) ([Demo](#))

- Developed a health monitoring system with real-time updates using the Observer design pattern.
- Implemented recommendation algorithms like collaborative filtering and regression models to analyze health data.

LEADERSHIP

Vice President Talent

January 2025 - Present

Carleton University Blueprint

Ottawa, Ontario

- Leading talent strategy and hiring of passionate volunteer developers across **10+** impact-driven nonprofit projects.
