EDUCATION

Carleton University

Bachelor of Computer Science Honours

Ottawa, Ontario

Expected Graduation: December 2026

WORK EXPERIENCE

Shopify Inc.

Software Engineer Intern - Shopify Ads

May 2026 - August 2026

Toronto, Ontario

- Building merchant-facing ad tools for campaign setup, optimization, and performance tracking across ads surfaces.

Shopify Inc.

Software Engineer Intern - Sell in Minutes Team

May 2025 - August 2025

Toronto, Ontario

- Built **Ruby** services powering Gemini voicebots, routing Twilio voice traffic through an internal **LLM proxy** for PII redaction and merchant-context prompt enrichment across **3M+** merchants.
- Shipped localized, feature-flagged voicebot rollouts across **15+** countries using country-specific phone routing, reducing merchants' Time-to-First-Sale (TTFS) by **30%**.
- Designed a backward-compatible **GraphQL** schema and resolver layer replacing flaky mobile onboarding fields, supporting old and new clients through staged **zero-downtime** migration.
- Fixed **Ruby** session-state race conditions from async requests mutating shared session objects, restoring stable onboarding access for **500+** daily merchants via request ordering, state isolation, tests, and MonoRail telemetry.
- Refactored Pro/Lite plan selection flows into reusable **React** components, removing **10k+** lines of dead code while improving maintainability, UI consistency, and flow reuse.

Carleton University

Teaching Assistant for Data Structures and Algorithms

September 2022 - December 2024

Ottawa, Ontario

- Mentored **600+** students in mastering **Big-O analysis**, graph theory, and dynamic programming through office hours and technical workshops in **Java**.

Royal Bank of Canada

Software Developer Intern - Financial Data Exchange Team

May 2024 - August 2024

Toronto, Ontario

- Engineered a reactive **Spring WebFlux** orchestration layer with async fan-out, timeout handling, and downstream request sequencing, reducing FDX API latency by **50% (4s to 2s)**.
- Built high-availability **Java REST APIs** with stateless **JWT auth** for financial data exchange, securing banking data access for **15M+** users.

Royal Bank of Canada

Software Developer Intern - DevOps Engineering Team

May 2023 - December 2023

Toronto, Ontario

- Built a **Python ETL** pipeline to normalize, batch, and cache **Entra ID** data, removing redundant directory calls and reducing frontend load times by **40%**.
- Developed a **TypeScript** access integration mapping permissions for **1000+** users, improving RBAC visibility.

PROJECTS

RepoLens AI | *Python, FastAPI, TypeScript, Gemini API, BM25, Docker, Google Cloud Run* ([GitHub](#)) ([Website](#))

- Built a **Dockerized, Cloud Run-deployed RAG** system for GitHub repos with source filtering, symbol-aware chunking, and file/line citation-grounded answers.
- Implemented **hybrid BM25/vector retrieval** with embedding-provider abstractions, heuristic reranking, and support for local, Chroma, Gemini, and Vertex AI-backed providers.
- Built a **golden-query eval suite** measuring **Recall@K**, MRR, groundedness, hallucination rate, citation accuracy, p95 latency, and cost/query across retrieval strategies.
- Added **prompt-injection checks**, request tracing, structured logs, and **Prometheus-style** metrics to improve answer safety and production debuggability.

TECHNICAL SKILLS

Languages: C++, Java, Ruby, Python, TypeScript, SQL

Frameworks & Libraries: Ruby on Rails, FastAPI, React, Spring Boot, Spring WebFlux

APIs & Cloud Platforms: GraphQL, REST, Gemini API, Google Cloud, AWS, Docker, Kubernetes, OpenShift

Tools: Linux, Git, Jenkins
